

MBC's Philosophy Regarding General Education

“General education courses are considered essential to give the student a well-balanced education and an appreciation of the world God has made. The Christian worker must be able to speak as an educated person to educated people. Because every student is a Bible major, every course is taught with the needs of the Bible major and Christian worker in mind. However, the value of such courses depends on their being taught as an independent discipline. To demand less than excellence here would be less than Christian.

Magnolia Bible College's philosophy of education is implemented by the integration of these essential elements: classroom instruction in the field, and the daily association of students with a dedicated and godly staff.”

2007-2008 College Catalog, pp. 8 & 9

MAGNOLIA BIBLE COLLEGE

An accredited four-year Bible College located in the heart of Mississippi.

Magnolia Bible College is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award a baccalaureate degree. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097 or call 404-679-4501 for questions about the status of Magnolia Bible College. (Inquiries to the Commission should pertain only to the accreditation status of MBC. All other inquiries should be made to the college.)

What About Gen. Ed.?

How Will It Help Me?

**MBC requires 39 hours of
General Education
Courses to complete a
degree.**

**Those hours are important
to the graduate.**

The Purpose of General Education Courses in a Bible Degree from MBC

A broad general education
enables one to ...

- Understand himself or herself and the world God has made
- Connect with the world in significant ways
- Be more effective in a world that increasingly is becoming more educated and diverse

Objectives

Students who complete the General Education segment of their degree at MBC should be able to:

- Express themselves effectively using written and spoken English
- Think critically
- Appreciate the scientific method and the impact of science on daily life
- Express themselves in quantitative terms
- Appreciate the value and significance of culture
- Understand global influence, past and present
- Use technology to access, retrieve, process and communicate effectively
